

# Snow Tue Night - Thu Afternoon

January 31, 2022  
4:26 PM

## Key Messages

- Rain will transition to a wintry mix Tue evening and Tue night before changing to all snow Tue night and early Wed
- Accumulating snow with greatest impact in SC and SE KS
- Plan now for hazardous travel on Wednesday into Thursday morning
- Snow will primarily be fluffy or drier

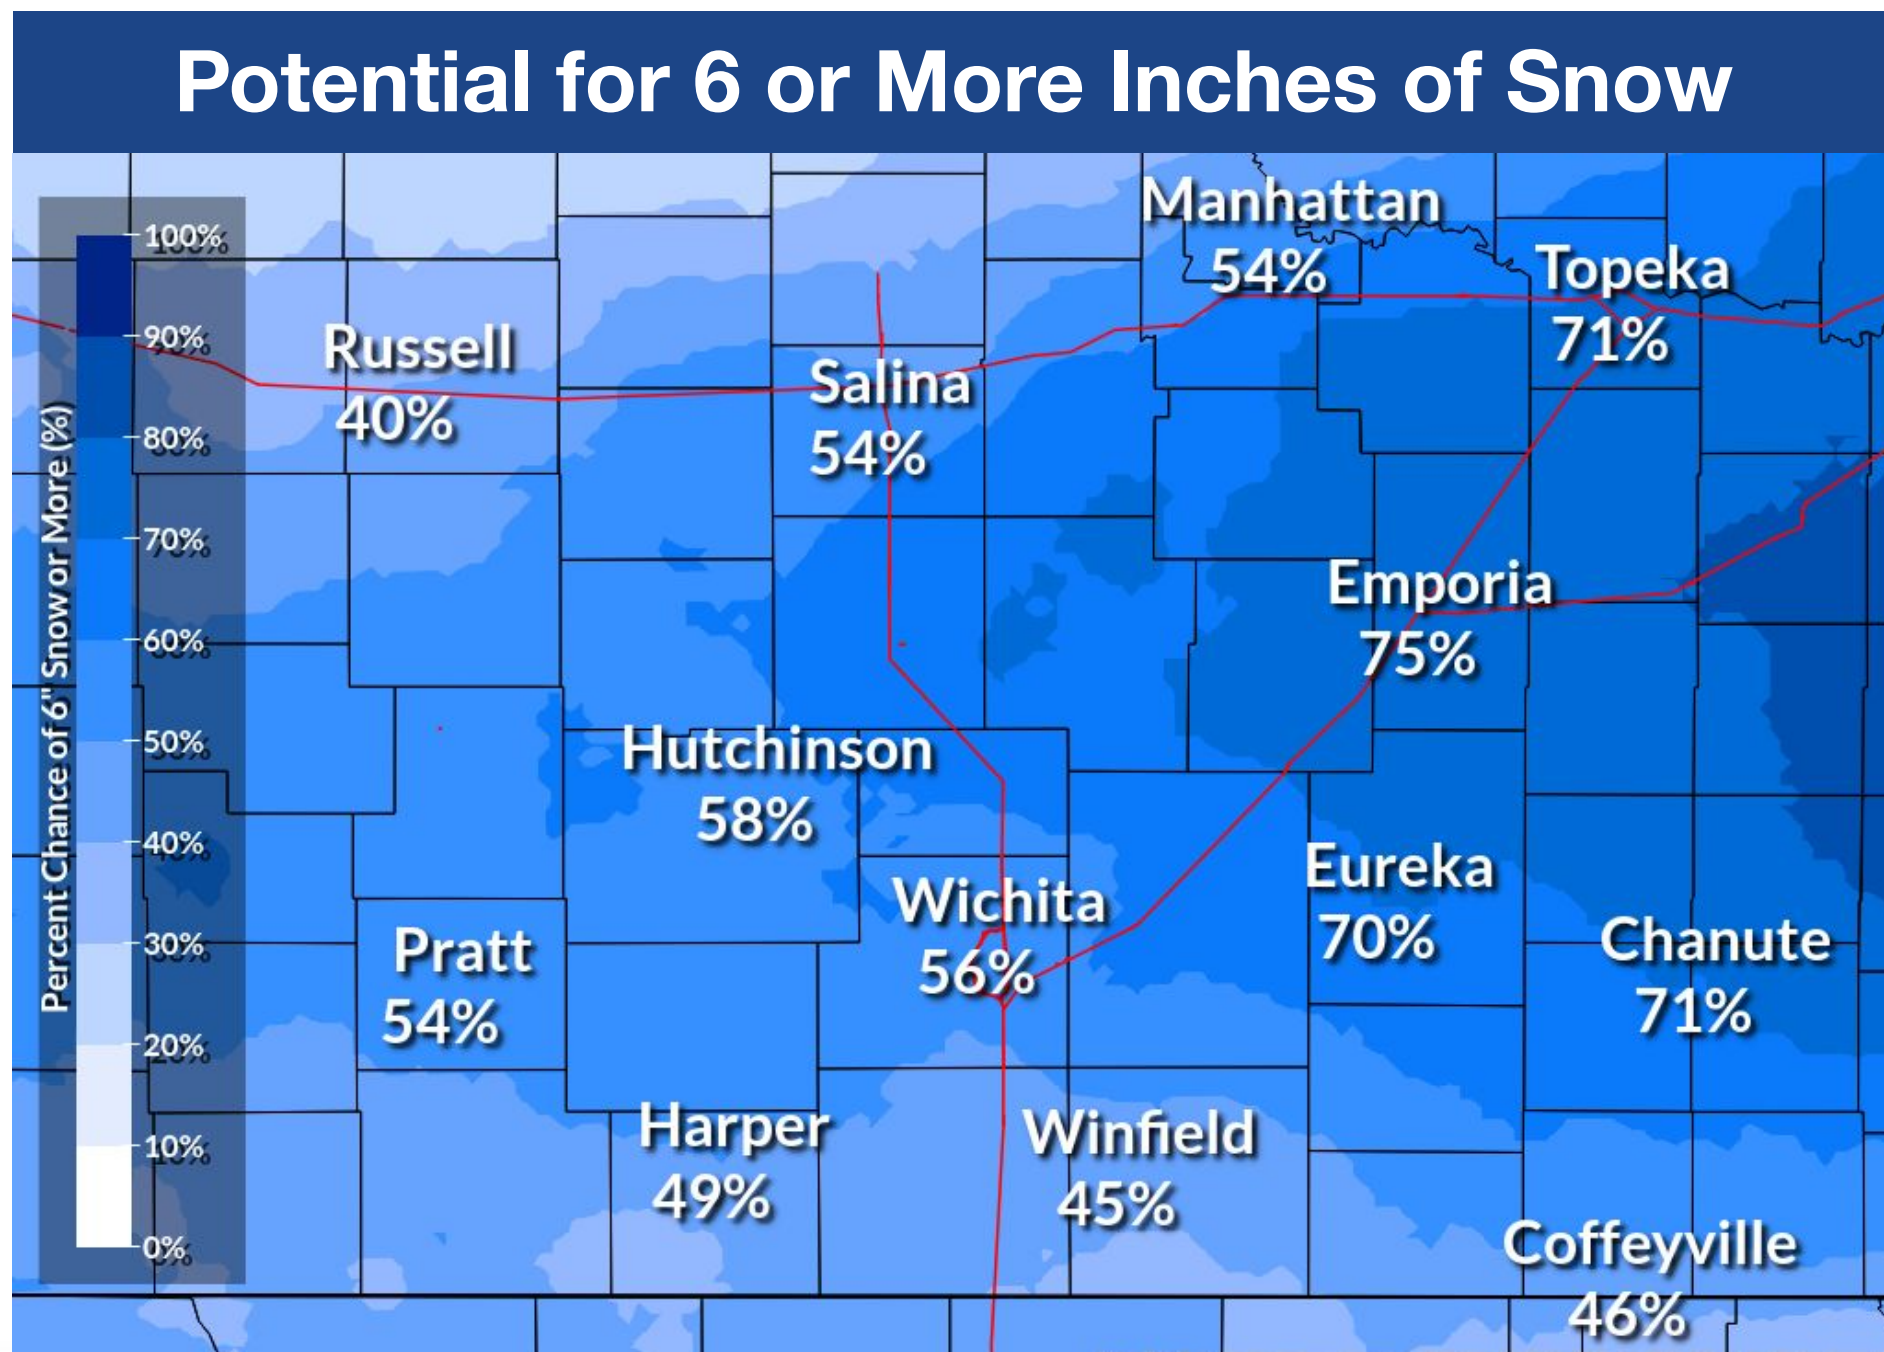

# Snow Tue Night - Thu Afternoon

January 31, 2022  
4:26 PM

## Overview

- There is some potential we could see locally higher amounts. This graphic shows the probability for 6 or MORE inches of snow, indicating the best chances across eastern Kansas

## Forecast Confidence Levels

### Timing

### Location

### Snow Amounts

### Precipitation Type

### Confidence Details

- High confidence that the onset of the wintry impacts will be around midnight Tuesday night/early Wednesday. End timing of the event is uncertain thus confidence was slightly lowered with lingering snow into Thursday.
- High confidence in the location and snow amounts but still some uncertainty in where the highest amounts will be.
- Confidence is very high that we are looking at a mostly snow event. There is some uncertainty in southeast Kansas and the longevity of a wintry mix.

Wichita							
Chanute							
Hutchinson							
Salina							
Great Bend							

## Winter Driving

Slow down and use caution if you must travel during this upcoming winter storm as road conditions can change quickly. Before you travel, pack a winter survival kit for your vehicle. If possible, consider altering your travel plans.
